

The Moroccan Pharmaceutical Industry
as a Catalyst for African Health Sovereignty

Local Production Global Impact

The federation at the heart of the Moroccan pharmaceutical industry

Established in 1985, the Moroccan Federation of Pharmaceutical Industry and Innovation (FMIIP, formerly AMIP) is the leading organization representing the pharmaceutical industry in Morocco.

It brings together the country's leading national and international laboratories with local manufacturing facilities and represents a major share of Morocco's pharmaceutical activity.

FMIIP works alongside public authorities and the broader health ecosystem to:

**strengthen Morocco's health
sovereignty and contribute to
that of the African continent**

**support local
pharmaceutical
manufacturing**

**improve access to
medicines**

**encourage innovation and
pharmaceutical research**

**enhance Africa's
pharmaceutical reach**

**strengthen sector-wide
capabilities**

Committed for life

Moroccan pharmaceutical manufacturers
share a common responsibility:

to help protect and improve public health.

They also pursue their mission through a dynamic of South-South cooperation, grounded in knowledge-sharing, technology transfer and capacity-building, in support of sustainable health development at the regional level.

A structured industry meeting international standards

Morocco benefits from a structured pharmaceutical ecosystem aligned with international standards.

Its key strengths include:

a National Medicines Control Laboratory recognized by the World Health Organization (WHO)

a reference National Pharmacovigilance Centre

industrial infrastructure meeting international standards

highly qualified human capital

a solid regulatory framework.

Moroccan laboratories manufacture a broad range of medicines covering all therapeutic areas, including:

generic medicines

innovative medicines

biosimilars

biotechnology-based products

A vision in the service of health sovereignty

The Moroccan pharmaceutical industry actively contributes to national health sovereignty and to the development of the health-care system.

The sector's strategic priorities are built around:

Health Sovereignty

Strengthening national capacity to ensure a continuous supply of essential medicines.

Made in Morocco

Making Moroccan pharmaceutical production a benchmark for quality,

Access to Medicines

Supporting equitable access to treatment, particularly through the promotion of generic medicines.

Regional Reach

Expanding exports and reinforcing pharmaceutical cooperation with African countries.

FMIIP members

FMIIP brings together 70% of the pharmaceutical industry players operating in Morocco.

These national and international laboratories contribute to the Kingdom's industrial, scientific and healthcare development.
